Name: Eleanor Aimee O. Reantaso

Course & Year: BSIS 2B

Subject: IS ELEC 2 - Web Systems

Professor: Guillermo Red

Week 7 — MiniFullStackStarter

In this final week, I combined everything I had learned across the semester — HTML, CSS, JavaScript, Bootstrap, APIs, and Local Storage — into one complete, functional project. The biggest challenge was making sure all the different parts worked well together without conflicts or errors. I solved this by building and testing my code step-by-step, adding one feature at a time instead of doing everything all at once. I also improved my project structure by organizing my files into clear folders, making it easier to manage and deploy.
